

ANVISA REGULATORY AGENDA 2026-2027

LIST OF AGENDA TOPICS

(approved on December 10, 2025)

Total of 161 Topics, including 26 periodic updates

1. CROSS-CUTTING ISSUES

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
1.1	Authorization for stock depletion of products subject to health surveillance	1. Enable safe access to essential products and services for the population's health
1.2	Sharing of production areas	1. Enable safe access to essential products and services for the population's health
1.3	Control and inspection of substances under special control and plants that may originate them (Revision of Ordinance SVS/MS No. 344/1998)	1. Enable safe access to essential products and services for the population's health

N.	Topic Name Topic	Strategic Objective Related to the Topic
1.4	Definition of procedures for judging Sanitary Administrative Processes (PAS)	1. Enable safe access to essential products and services for the population's health
1.5	Guidelines and procedures to be observed for executing Terms of Conduct Adjustment Commitment (TCAC) within Anvisa	1. Enable safe access to essential products and services for the population's health
1.6	Establishment of an Experimental Regulatory Environment (Regulatory Sandbox) model for Anvisa	2. Contribute to the development of promising new technologies in the health area in the country
1.7	Identification of strategies to promote access to information necessary for safe consumption of cosmetics and sanitizers by visually impaired people	4. Empower people with information to make the best health choices
1.8	Procedures for classification of border products	2. Contribute to the development of promising new technologies in the health area in the country
1.9	Procedures related to the analysis and deliberation of administrative appeals submitted to the General Resource Management	1. Enable safe access to essential products and

N.	Topic Name Topic	Strategic Objective Related to the Topic
		services for the population's health
1.10	Regulation to define procedures related to Anvisa's inspection actions	1. Enable safe access to essential products and services for the population's health
1.11	Regulation of criteria for cultivation of the plant species Cannabis sativa L. that demonstrably produces total tetrahydrocannabinol (THC) content less than or equal to 0.3%, expressed by weight per weight (w/w) in dried inflorescences, in compliance with the ruling issued by the Superior Court of Justice in Special Appeal No. 2024250/PR, representative of Assumption of Competence Incident 16	1. Enable safe access to essential products and services for the population's health
1.12	Requirements for regularization of products intended for aesthetic procedures with dermal action	1. Enable safe access to essential products and services for the population's health
1.13	Revision of the norm that creates the National Network of Toxicological Information and Assistance Centers - RENACIAT (Revision of RDC No. 19/2005)	1. Enable safe access to essential products and services for the population's health
1.14	Revision of criteria and procedures to enable the supply of products subject to health surveillance by the Unified Health System	3. Anticipate and respond effectively to health crises and public health emergencies

N.	Topic Name	Strategic Objective
Topic		Related to the Topic
1.15	Point revision of ownership transfer of regularized products (Revision of RDC No. 903/2024)	1. Enable safe access to essential products and services for the population's health
1.16	Validity of the Good Manufacturing Practices Certificate - CBPF during the product registration validity period and differentiated validity period based on health risk	1. Enable safe access to essential products and services for the population's health
1.17	Periodic update of lists of substances, plants and fungi subject to special control (update of Ordinance SVS No. 344/1998)	1. Enable safe access to essential products and services for the population's health
1.18	Periodic update of thalidomide control and medications containing it	1. Enable safe access to essential products and services for the population's health

2. PESTICIDES

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
2.1	Criteria for conducting pesticide residue studies to establish Maximum Residue Limits (MRL) of pesticides in food (Revision	1. Enable safe access to essential products and services for the

N.	Topic Name Topic	Strategic Objective Related to the Topic
	of RDC No. 4/2012)	population's health
2.2	Criteria for toxicological evaluation and classification, analysis prioritization and comparison of toxicological action of pesticides (Revision of RDC No. 294/2019)	1. Enable safe access to essential products and services for the population's health
2.3	Criteria for utilizing toxicological evaluations for registration purposes obtained by Equivalent Regulatory Authority (AREE) through optimized analysis procedure	6. Promote intensive data use
2.4	Maximum limits of relevant impurities to be investigated in five-batch studies and controlled post-registration (Instruction INC)	1. Enable safe access to essential products and services for the population's health
2.5	Toxicological reassessment of active ingredient Epoxiconazole	1. Enable safe access to essential products and services for the population's health
2.6	Toxicological reassessment of active ingredient Thiophanate-methyl	1. Enable safe access to essential products and services for the population's health
2.7	Regulation of pesticide advertising supervision	4. Empower people with information to make the best health choices
2.8	Revocation of Resolution RDC No. 184, of October 17, 2017, and determination of migration of products filed via SIPTOX	1. Enable safe access to essential products and services for the population's health

N.	Topic Name	Strategic Objective Related to the Topic
2.9	Periodic update of the list of monographs of active ingredients of pesticides, disinfectant sanitizers and wood preservatives	4. Empower people with information to make the best health choices

3. FOOD

N.	Topic Name	Strategic Objective Related to the Topic
3.1	Regulation of quantitative declaration of ingredients on packaged food labeling	4. Empower people with information to make the best health choices
3.2	Regulation of gluten-free labeling on foods	4. Empower people with information to make the best health choices
3.3	Regulation of lists of authorized novel foods and novel ingredients and their specifications	1. Enable safe access to essential products and services for the population's health
3.4	Regulation of technology use for information transmission on food labeling	4. Empower people with information to make the best health choices

N. Topic	Topic Name	Strategic Objective Related to the Topic
3.5	Regulation of formulated colorant additives and labeling of colorants and flavorings in packaged foods	4. Empower people with information to make the best health choices
3.6	Regulation of foods for medical purposes	1. Enable safe access to essential products and services for the population's health
3.7	Regulation of plant-based foods	4. Empower people with information to make the best health choices
3.8	Regulation of sanitary requirements for silicone materials in contact with food	1. Enable safe access to essential products and services for the population's health
3.9	Regulation on the use of recycled plastic materials in contact with food	1. Enable safe access to essential products and services for the population's health
3.10	Nutrивigilance requirements	1. Enable safe access to essential products and services for the population's health

N.	Topic Name Topic	Strategic Objective Related to the Topic
3.11	Revision of regulation of food additives and technology coadjuvants authorized for use in dairy products	1. Enable safe access to essential products and services for the population's health
3.12	Revision of regulation of food additives and technology coadjuvants in foods	1. Enable safe access to essential products and services for the population's health
3.13	Revision of regulation of authorization for use and labeling of sweetener additives in foods	1. Enable safe access to essential products and services for the population's health
3.14	Revision of regulation of contaminants in foods	1. Enable safe access to essential products and services for the population's health
3.15	Revision of regulation of food-grade PET-PCR packaging intended to come into contact with food	1. Enable safe access to essential products and services for the population's health
3.16	Revision of regulation of food enrichment and restoration	1. Enable safe access to essential products and services for the population's health

N.	Topic Name	Strategic Objective Related to the Topic
3.17	Revision of regulation of foreign matter in foods	1. Enable safe access to essential products and services for the population's health
3.18	Revision of regulation of sanitary requirements for flavored ice for beverages	1. Enable safe access to essential products and services for the population's health
3.19	Revision of regulation on human health risk assessment of veterinary medicines, maximum residue limits (MRL) in foods of animal origin and analysis methods	1. Enable safe access to essential products and services for the population's health
3.20	Revision of regulation on food irradiation	4. Empower people with information to make the best health choices
3.21	Revision of regulation on cellulosic materials, packaging and equipment intended to come into contact with food	1. Enable safe access to essential products and services for the population's health
3.22	Revision of regulation on monomers, other initiating substances and authorized polymers for elaboration of plastic packaging and equipment in contact with food	1. Enable safe access to essential products and services for the population's health

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
3.23	Revision of regulation on regularization of foods exempt from registration	1. Enable safe access to essential products and services for the population's health
3.24	Revision of regulation on labeling of allergenic foods	4. Empower people with information to make the best health choices
3.25	Revision of regulation on general labeling of packaged foods	4. Empower people with information to make the best health choices
3.26	Revision of regulation on nutritional labeling of packaged foods	4. Empower people with information to make the best health choices
3.27	Revision of good practices for food services (Revision of RDC No. 216/2004)	1. Enable safe access to essential products and services for the population's health
3.28	Revision of hygienic-sanitary requirements and good manufacturing practices for establishments producing or manufacturing food (Revision of RDC No. 275/2002)	1. Enable safe access to essential products and services for the population's health
3.29	Periodic update of the list of authorized plant parts for tea preparation and use as spices	1. Enable safe access to essential products and

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
		services for the population's health
3.30	Periodic update of the list of constituents, usage limits, claims and complementary labeling of dietary supplements	1. Enable safe access to essential products and services for the population's health
3.31	Periodic update of the list of authorized plant species, designations, fatty acid composition and maximum values of acidity and peroxide index for vegetable oils and fats	1. Enable safe access to essential products and services for the population's health
3.32	Periodic update of the list of maximum tolerated limits (LMT) of contaminants in foods	1. Enable safe access to essential products and services for the population's health
3.33	Periodic update of the list of MRL, ADI, ARfD for active ingredients of veterinary medicines in foods of animal origin	1. Enable safe access to essential products and services for the population's health
3.34	Periodic update of lists of food additives and technology coadjutants authorized for use in foods	1. Enable safe access to essential products and services for the population's health
3.35	Periodic update of lists of constituents, usage limits and claims for infant formulas, transition foods and cereal-based foods for infants and young	1. Enable safe access to essential products and

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
	children, enteral nutrition formulas and dietotherapeutic formulas for inborn errors of metabolism	services for the population's health

4. COSMETICS

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
4.1	Establishment of new regularization model for personal hygiene, cosmetics and perfume products, with emphasis on health risk management	1. Enable safe access to essential products and services for the population's health
4.2	Establishment of technical requirements and simplified procedures for regularization of personal hygiene, cosmetics and perfume products produced artisanally, to comply with Law No. 15,154, of June 30, 2025	1. Enable safe access to essential products and services for the population's health
4.3	Regulation of Law No. 15,183, of July 30, 2025, which prohibits the use of animals in testing personal hygiene, cosmetics and perfume products and their ingredients	1. Enable safe access to essential products and services for the population's health
4.4	Requirements for regularization, commercialization and use of products intended to fix and/or shape hair	1. Enable safe access to essential products and services for the population's health
4.5	Revision of technical regulation for companies that carry out fractionation activities of Personal Hygiene, Cosmetics and Perfume	1. Enable safe access to essential products and services for the population's health

N.	Topic Name	Strategic Objective Related to the Topic
	Products with direct sales to consumers (Revision of RDC No. 108/2005)	
4.6	Periodic update of the list of active ingredients permitted in cosmetic products to straighten or wave hair	1. Enable safe access to essential products and services for the population's health
4.7	Periodic update of lists of permitted substances (preservatives, colorants, filters and straighteners), with restricted use or prohibited in personal hygiene, cosmetics and perfume products	1. Enable safe access to essential products and services for the population's health

5. MEDICAL DEVICES

N.	Topic Name	Strategic Objective Related to the Topic
5.1	Update of regulatory framework on tattoo pigments	3. Anticipate and respond effectively to health crises and public health emergencies
5.2	Sanitary control of combination products	1. Enable safe access to essential products and services for the population's health
5.3	Availability of database on Unique Device Identification (UDI) from Anvisa, as determined by paragraph 3 of article 15 of RDC No. 591/2021	1. Enable safe access to essential products and services for the population's health

N.	Topic Name	Strategic Objective Related to the Topic
5.4	Identification of strategies to promote access to information necessary for safe consumption of health products by visually impaired people	1. Enable safe access to essential products and services for the population's health
5.5	Economic monitoring of medical devices	4. Empower people with information to make the best health choices
5.6	Mandatory participation in MDSAP for certification purposes of international manufacturers of medical devices (Revision of RDC No. 687/2022)	1. Enable safe access to essential products and services for the population's health
5.7	Regulation of innovation in medical devices	2. Contribute to the development of promising new technologies in the health area in the country
5.8	Regulation of in vitro diagnostic (IVD) medical devices subject to prior analysis	1. Enable safe access to essential products and services for the population's health
5.9	Reprocessing of medical devices	1. Enable safe access to essential products and services for the population's health
5.10	Requirements for prior analysis of blood glucose monitoring self-test systems (glucometers, test strips, controls and calibrators)	1. Enable safe access to essential products and services for the population's health

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
5.11	Revision of regularization of software as a medical device (Software as a Medical Device - SaMD) (Revision of RDC No. 657/2022)	2. Contribute to the development of promising new technologies in the health area in the country
5.12	Revision of technovigilance regulatory framework focused on companies holding health product (medical device) registrations	1. Enable safe access to essential products and services for the population's health
5.13	Revision and update of the norm governing registration of personalized medical devices	1. Enable safe access to essential products and services for the population's health
5.14	Periodic update of equipment certification under health surveillance regime, within the scope of the Brazilian Conformity Assessment System (SBAC)	1. Enable safe access to essential products and services for the population's health

6. PHARMACOPOEIA

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
6.1	Update on admissibility of foreign pharmaceutical codes (Revision of RDC No. 511/2021)	1. Enable safe access to essential products and services for the population's health
6.2	Implementation of good pharmacopoeial practices in the Brazilian Pharmacopoeia	1. Enable safe access to essential products and services for the population's

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
		health
6.3	Revision of Brazilian Pharmacopoeia collegiate bodies and their Internal Regulations (Revision of RDC No. 467/2021)	1. Enable safe access to essential products and services for the population's health
6.4	Periodic update of the list of Brazilian Common Denominations (DCB)	1. Enable safe access to essential products and services for the population's health
6.5	Periodic update of Brazilian Pharmacopoeia (FB) compendia	1. Enable safe access to essential products and services for the population's health

7. PHARMACEUTICAL INPUTS

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
7.1	Update of regulatory requirements related to DIFA and CADIFA issuance	1. Enable safe access to essential products and services for the population's health
7.2	Revision of good practice requirements for fractionation and distribution of pharmaceutical inputs (Revision of RDC No. 204/2006)	1. Enable safe access to essential products and services for the population's health

8. ANALYTICAL LABORATORIES

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
8.1	Revision of good practices for quality control laboratories	1. Enable safe access to essential products and services for the population's health

9. MEDICINES

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
9.1	International alignment of requirements for analytical validation in medicines	5. Obtain recognition as an international reference health authority
9.2	Presentation of efficacy, safety and quality evidence for similar medicines without elected reference medicine	1. Enable safe access to essential products and services for the population's health
9.3	Update of clinical research on advanced therapy products, based on publication of Law No. 14,874/2024 (Update of RDC No. 506/2021)	2. Contribute to the development of promising new technologies in the health area in the country

N.	Topic Name Topic	Strategic Objective Related to the Topic
9.4	Update of technical and regulatory requirements for registration of biological products	1. Enable safe access to essential products and services for the population's health
9.5	General guidelines for good radiopharmaceutical preparation practices in health facilities and radiopharmacies	1. Enable safe access to essential products and services for the population's health
9.6	Formalization of the National Pharmacovigilance System	1. Enable safe access to essential products and services for the population's health
9.7	Implementation of e-CTD	1. Enable safe access to essential products and services for the population's health
9.8	Registration and post-registration of specific medicines (Revision of RDC No. 24/2011 and RDC No. 76/2016)	1. Enable safe access to essential products and services for the population's health
9.9	Rules for approval of medicine names, their complements and formation of medicine families	4. Empower people with information to make the best health choices

N.	Topic Name Topic	Strategic Objective Related to the Topic
9.10	Regulation of procedures for sending medicine distribution maps, according to article 3-A of Law No. 11,903, of January 14, 2009	1. Enable safe access to essential products and services for the population's health
9.11	Regulation on control of Thalidomide and medicines containing it (Revision of RDC No. 11/2011 and proposed IN with therapeutic indications)	1. Enable safe access to essential products and services for the population's health
9.12	Sanitary requirements for regularization and surveillance of industrialized medicines for human use throughout their life cycle	1. Enable safe access to essential products and services for the population's health
9.13	Revision of the norm on pharmaceutical equivalence studies and comparative dissolution profile (Revision of RDC No. 31/2010)	5. Obtain recognition as an international reference health authority
9.14	Revision of good manufacturing practices complementary to sterile medicines (Revision of IN No. 35/2019)	1. Enable safe access to essential products and services for the population's health
9.15	Revision of good pharmacovigilance practices for medicine registration holders (Revision of RDC No. 406/2020)	1. Enable safe access to essential products and services for the population's health

N.	Topic Name Topic	Strategic Objective Related to the Topic
9.16	Revision of Cannabis product regulation for medicinal purposes (Revision of RDC No. 327/2019)	1. Enable safe access to essential products and services for the population's health
9.17	Revision of good compounding practices in pharmacies (Revision of RDC No. 67/2009)	1. Enable safe access to essential products and services for the population's health
9.18	Revision of rules for elaboration, harmonization, updating, publication and availability of medicine package inserts for patients and healthcare professionals	4. Empower people with information to make the best health choices
9.19	Revision of regulatory impact of good distribution, storage and transportation practices for medicines (Revision of RDC No. 430/2020, amended by RDC No. 653/2022)	1. Enable safe access to essential products and services for the population's health
9.20	Revision of regulatory framework for conducting and evaluating stability studies of biological products	1. Enable safe access to essential products and services for the population's health
9.21	Revision of regulatory framework for sanitary regularization of radiopharmaceuticals	1. Enable safe access to essential products and services for the population's health

N. Topic	Topic Name	Strategic Objective Related to the Topic
9.22	Revision of optimized analysis procedure for Good Manufacturing Practices Certification (Revision of IN No. 292/2024)	1. Enable safe access to essential products and services for the population's health
9.23	Revision of Regulation for conducting clinical trials with medicines in Brazil (Revision of RDC No. 945/2024 and INs on investigational medicine quality, clinical trial safety monitoring and decentralization of clinical trials)	1. Enable safe access to essential products and services for the population's health
9.24	Revision of regulation for expanded access programs, compassionate use and post-study medicine supply (Revision of RDC No. 38/2013)	1. Enable safe access to essential products and services for the population's health
9.25	Revision of criteria for classification in priority category of registration, post-registration and prior approval petitions in clinical research of medicines, according to public relevance (Revision of RDC No. 204/2017 and RDC No. 205/2017)	1. Enable safe access to essential products and services for the population's health
9.26	Revision of procedures and criteria for analysis via reliance in regularization of medicines and biological products	1. Enable safe access to essential products and services for the population's health
9.27	Revision of procedures for discontinuation of medicine manufacture or importation, as well as reactivation (Revision of RDC No. 18/2014)	1. Enable safe access to essential products and services for the population's health

N.	Topic Name Topic	Strategic Objective Related to the Topic
9.28	Revision of quality requirements for preparation of registration and post-registration dossiers of synthetic medicines (Revision of RDC No. 73/2016 and quality part of RDC No. 753/2022)	1. Enable safe access to essential products and services for the population's health
9.29	Terms of commitment for registration, post-registration or temporary emergency use authorization of medicines	1. Enable safe access to essential products and services for the population's health
9.30	Periodic update of seasonal Influenza vaccine composition	1. Enable safe access to essential products and services for the population's health
9.31	Periodic update of Covid-19 vaccine composition	1. Enable safe access to essential products and services for the population's health
9.32	Periodic update of the list of administration forms (conventional release pharmaceutical forms) and analytes to be quantified in relative bioavailability/bioequivalence (BA/BE) studies and pharmacokinetic studies	1. Enable safe access to essential products and services for the population's health
9.33	Periodic update of the list of qualified impurities and their respective limits	1. Enable safe access to essential products and services for the population's health

N.	Topic Name Topic	Strategic Objective Related to the Topic
9.34	Periodic update of the list of medicines based on substances classified as antimicrobials, for prescription use, subject to specific control	1. Enable safe access to essential products and services for the population's health
9.35	Periodic update of the list of Low Risk Medicines subject to notification (LMN)	1. Enable safe access to essential products and services for the population's health
9.36	Periodic update of the List of Reference Medicines	1. Enable safe access to essential products and services for the population's health
9.37	Periodic update of the list of Over-the-Counter Medicines (LMIP)	4. Empower people with information to make the best health choices
9.38	Periodic update of therapeutic indications for registration and notification of homeopathic medicines	1. Enable safe access to essential products and services for the population's health

10. ORGANIZATION AND MANAGEMENT OF SNVS

N. Topic	Topic Name	Strategic Objective Related to the Topic
10.1	Guidelines for risk classification of economic activities subject to health surveillance	1. Enable safe access to essential products and services for the population's health
10.2	Guidelines for organization of the National Health Surveillance System (SNVS) and decentralization of sanitary inspection and surveillance actions	1. Enable safe access to essential products and services for the population's health
10.3	Revision of procedure harmonization within SNVS (Revision of RDC No. 34/2013 and IN No. 5/2013)	1. Enable safe access to essential products and services for the population's health

11. PORTS, AIRPORTS AND BORDERS

N. Topic	Topic Name	Strategic Objective Related to the Topic
11.1	Sanitary Control of Aircraft and Airports focused on Health Risk (Revision of RDC No. 2/2003)	1. Enable safe access to essential products and services for the population's health

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
11.2	Sanitary control of ports and vessels (Revision of RDC No. 72/2009)	1. Enable safe access to essential products and services for the population's health
11.3	Revision of rules and procedures for control and inspection of foreign trade operations of goods and products subject to health surveillance (Revision of RDC No. 81/2008)	1. Enable safe access to essential products and services for the population's health
11.4	Revision of Anvisa Integrated AEO Program (Revision of RDC No. 845/2024)	1. Enable safe access to essential products and services for the population's health
11.5	Periodic update of epidemiological scenario and temporary health measures for ports and airports	1. Enable safe access to essential products and services for the population's health

12. SANITIZERS

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
12.1	GMP Certificate as requirement for registration of disinfectants and enzymatic detergents for hospital use	1. Enable safe access to essential products and services for the population's health
12.2	Establishment of new regularization model for sanitizing products with emphasis on health risk management	1. Enable safe access to essential products and services for the

N.	Topic Name Topic	Strategic Objective Related to the Topic
		population's health
12.3	Requirements for regularization of biological agents (macroorganisms) for vector and pathogen control in urban environments	2. Contribute to the development of promising new technologies in the health area in the country
12.4	Sanitary requirements for sanitizing products based on viable microorganisms for surface cleaning	1. Enable safe access to essential products and services for the population's health
12.5	Revision of technical regulation with requirements for registration and notification of sanitizing products (Point revision of RDC No. 989/2025)	1. Enable safe access to essential products and services for the population's health
12.6	Revision of criteria for regularization of cleaning products and related products and on biodegradability of anionic surfactants (Revision RDC No. 694/2022, which internalizes GMC norm No. 47/07 - Mercosur)	1. Enable safe access to essential products and services for the population's health
12.7	Post-use surveillance of sanitizing products	1. Enable safe access to essential products and services for the population's health
12.8	Periodic update of the list of permitted preservatives for sanitizing products	1. Enable safe access to essential products and services for the population's health

13. BLOOD, TISSUES, CELLS AND ORGANS

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
13.1	Revision and update of sanitary requirements related to good practices in the blood cycle	1. Enable safe access to essential products and services for the population's health
<hr/>		

14. SERVICES OF INTEREST TO HEALTH

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
14.1	Sanitary requirements for good practices in elderly care services	1. Enable safe access to essential products and services for the population's health
<hr/>		

15. HEALTH SERVICES

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
15.1	Good practices in pharmacies and drugstores - Pharmaceutical services (Revision of Chapter VI of RDC/Anvisa No. 44/2009)	1. Enable safe access to essential products and services for the population's health
<hr/>		

N. Topic	Topic Name	Strategic Objective Related to the Topic
15.2	Good practices for organization and operation of aesthetic services	1. Enable safe access to essential products and services for the population's health
15.3	Good practices for organization and operation of bedside dialysis services (Revision of RDC/Anvisa No. 11/2014)	1. Enable safe access to essential products and services for the population's health
15.4	Good practices for organization and operation of in vivo nuclear medicine services	1. Enable safe access to essential products and services for the population's health
15.5	Good practices for processing medical devices used in health care	1. Enable safe access to essential products and services for the population's health
15.6	Infrastructure of healthcare facilities	1. Enable safe access to essential products and services for the population's health
15.7	Regulation of good practices and prevention and control of Healthcare-Associated Infections (HAI) and Antimicrobial Resistance (AMR)	1. Enable safe access to essential products and services for the population's health
15.8	Technical regulation for operation of quality control providers for services performing clinical laboratory tests	1. Enable safe access to essential products and services for the population's health

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
15.9	Sanitary requirements for operation of services providing dental care	1. Enable safe access to essential products and services for the population's health

16. TOBACCO

N.	Topic Name	Strategic Objective Related to the Topic
Topic		
16.1	Control of smoking product supply chain	4. Empower people with information to make the best health choices
16.2	Packaging of smoking products	4. Empower people with information to make the best health choices
16.3	Display of smoking products at points of sale	4. Empower people with information to make the best health choices
16.4	Registration of tobacco-derived smoking products	4. Empower people with information to make the best health choices
16.5	Regulation of emerging smoking products, such as nicotine pouches	4. Empower people with information to make the best health choices
